| Liquidity coverage ratio | 173.43% | 167.39% | 164.32% | 161.99% | 161.46% |

Source: ECB.

¹⁾ As of the reference period Q1 2020, the liquidity sample matches the full sample. For entities where the ultimate EU parent of the banking group is located outside the SSM, the data show the highest level of consolidation reported to the ECB at the cut-off date. The obtained data are aggregated in the liquidity coverage ratio shown above.

²⁾ CET1, Tier 1 and total capital ratios are based on the transitional provisions laid down in Articles 465 to 491 of Regulation (EU) No 575/2013 on prudential requirements for credit institutions and investment firms (the Capital Requirements Regulation).

^{3) &}quot;cb" refers to "cash balances at central banks and other demand deposits".

⁴⁾ Stage 2 loans as a share of total loans and advances. Loans and advances at amortised cost (AC) and fair value through other comprehensive income (FVOCI). Cash balances at central banks and other demand deposits are excluded.

T01.01 Significant institutions by country and classification

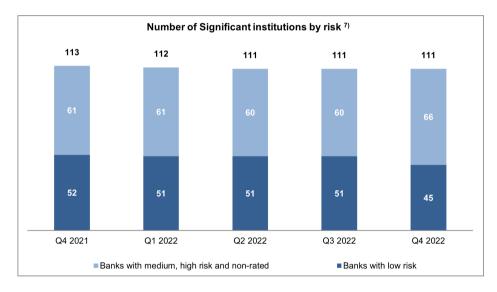

(number of institutions)

| Country | Q4 2022 |
|-------------|---------|
| Belgium | 5 |
| Bulgaria | 1 |
| Germany | 22 |
| Estonia | 3 |
| Ireland | 6 |
| Greece | 4 |
| Spain | 10 |
| France | 11 |

| Retail and consumer credit lenders | 13 |
| Small market lenders | 14 |
| Universal and investment banks | 20 |
| Not classified | - |
| Total | 111 |

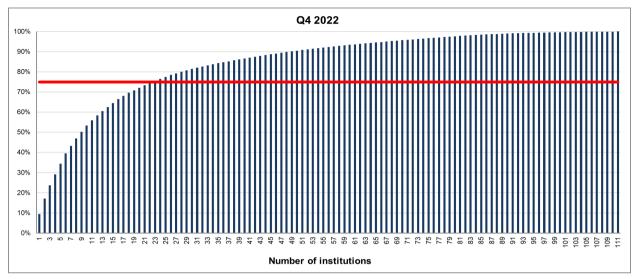

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

- 1) There are no significant institutions at the highest level of consolidation in Croatia and Slovakia.
- 2) G-SIBs: global systemically important banks. Data based on the last available list of G-SIBs as published by the Financial Stability Board.
- 3) Domestic exposures more than 95% of total debt securities and loans and advances.
- 4) Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM).
- 5) European countries not in the EEA.
- 6) RoW: rest of the world, i.e. all countries except European countries.
- 7) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

T01.02 Concentration of total assets

(cumulative percentages of total assets)

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

The charts show the cumulative percentage of the total assets in the sample which is covered when the total assets of each institution, ordered from the largest to the smallest, are added. For instance, it is shown that the largest institution in the sample accounts for almost 10% and the 20 largest institutions represent approximately 75% of the total assets in the sample. The solid line in red corresponds to the 75th percentile.

T02.01.1 Profit and loss figures by reference period

Source: ECB

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

- 2) Figures reported are year-to-date.
- 3) Operating income before administrative expenses and depreciation are deducted.
- 4) Provisions include provisions for "commitments and guarantees given" and "other provisions".

¹⁾ Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

⁵⁾ Profit and loss before tax from continued operations (i.e. "net income before impairment, provisions and taxes" + "impairment and provisions" + "other") plus profit and loss before tax from discontinued operations.

C: the value is suppressed for confidentiality reasons.

¹⁾ Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

²⁾ Figures reported are year-to-date.

³⁾ Operating income before administrative expenses and depreciation are deducted.

⁴⁾ Provisions include provisions for "commitments and guarantees given" and "other provisions".

⁵⁾ Profit and loss before tax from continued operations (i.e. "net income before impairment, provisions and taxes" + "impairment and provisions" + "other") plus profit and loss before tax from discontinued operations.

⁶⁾ There are no significant institutions at the highest level of consolidation in Croatia and Slovakia.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

³⁾ Figures reported are year-to-date.

⁴⁾ Operating income before administrative expenses and depreciation are deducted.

⁵⁾ Provisions include provisions for "commitments and guarantees given" and "other provisions".

⁶⁾ Profit and loss before tax from continued operations (i.e. "net income before impairment, provisions and taxes" + "impairment and provisions" + "other") plus profit and loss before tax from discontinued operations.

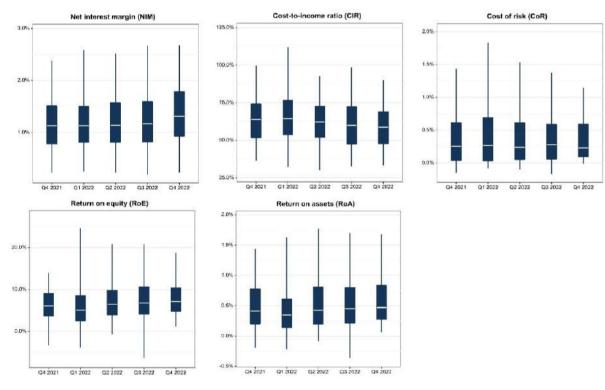

T02.02.1 Key performance indicators by reference period (percentages)

| Indicator 1) 2) | Q4 2021 | Q1 2022 | Q2 2022 | Q3 2022 | Q4 2022 |
|----------------------------|---------|---------|---------|---------|---------|
| Net interest margin (NIM) | 1.21% | 1.20% | 1.23% | 1.23% | 1.36% |
| Cost-to-income ratio (CIR) | 64.28% | 64.30% | 62.20% | 61.43% | 61.19% |
| Cost of risk (CoR) 3) | 0.50% | 0.56% | 0.52% | 0.48% | 0.47% |
| Return on equity (RoE) | 6.70% | 6.04% | 7.59% | 7.55% | 7.68% |
| Return on assets (RoA) | 0.43% | 0.37% | 0.46% | 0.44% | 0.49% |

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

- 1) RoE and RoA are computed by dividing "net profit/loss" by, respectively, "equity" and "total assets" at the end of the corresponding reference period. The values of "net profit/loss", originally year-to-date, are annualised to increase the comparability of the ratios across quarters.
- 2) Returns figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.
- 3) As set out in the list of definitions of ITS data points, the numerator of the cost of risk indicator is adjustments in allowances for estimated loan losses during the relevant period (annualised). Those adjustments may be negative in certain circumstances.

- 1) RoE and RoA are computed by dividing "net profit/loss" by, respectively, "equity" and "total assets" at the end of the corresponding reference period. The values of "net profit/loss", originally year-to-date, are annualised to increase the comparability of the ratios across quarters.
- 2) Returns figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.
- 3) G-SIBs: global systemically important banks. Data based on the last available list of G-SIBs as published by the Financial Stability Board.
- 4) As set out in the list of definitions of ITS data points, the numerator of the cost of risk indicator is adjustments in allowances for estimated loan losses during the relevant period (annualised). Those adjustments may be negative in certain circumstances.

T02.02.3 Key performance indicators by classification (risk-based) 1)

(percentages)

| Category ^{2) 3)} (Q4 2022) | Net interest margin (NIM) | Cost-to-income ratio (CIR) | Cost of risk (CoP) 4/ | Return on equity (RoE) | |
|--|------------------------------|-------------------------------|-----------------------|---------------------------|-------|
| Banks with low risk | 1.49% | 57.92% | 0.53% | 8.51% | 0.55% |
| Banks with medium, high risk and non-rated | 1.21% | 65.08% | 0.41% | 6.74% | 0.43% |

Source: ECB.

- 1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.
- 2) RoE and RoA are computed by dividing "net profit/loss" by, respectively, "equity" and "total assets" at the end of the corresponding reference period. The values of "net profit/loss", originally year-to-date, are annualised to increase the comparability of the ratios across quarters.
- 3) Returns figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.
- 4) As set out in the list of definitions of ITS data points, the numerator of the cost of risk indicator is adjustments in allowances for estimated loan losses during the relevant period (annualised). Those adjustments may be negative in certain circumstances.

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

¹⁾ Computed as the difference between "total assets" and the sum of the other sub-categories.

²⁾ An asset is considered to be encumbered if it has been pledged or if it is subject to any form of arrangement to secure, collateralise or credit-enhance any transaction from which it cannot be freely withdrawn.

| Investments in subsidiaries, joint-ventures and associates | 138.31 | 74.46 | 63.85 |
| Intangible assets and goodwill | 115.96 | 75.20 | 40.76 |
| Other assets ²⁾ | 1,083.88 | 588.87 | 495.00 |
| Total assets | 25,848.44 | 13,608.77 | 12,239.67 |
| Share of unencumbered assets 3) | 80.38% | 81.39% | 79.27% |
| Share of encumbered assets 3) | 19.62% | 18.61% | 20.73% |

Source: ECB

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Computed as the difference between "total assets" and the sum of the other sub-categories.

³⁾ An asset is considered to be encumbered if it has been pledged or if it is subject to any form of arrangement to secure, collateralise or credit-enhance any transaction from which it cannot be freely withdrawn.

T02.04.1 Composition of liabilities and equity by reference period (EUR billions)

| Liabilities and equity | Q4 2021 | Q1 2022 | Q2 2022 | Q3 2022 | Q4 2022 |

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ In line with IAS 37.10 and IAS 1.54(I).

³⁾ Computed as the difference between "total liabilities and equity" and the sum of the other sub-categories.

⁴⁾ Computed as the difference between "equity" and the sum of the other sub-categories.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. In accordance with the applicable regulation, reporting requirements apply to sovereign exposures where the aggregate carrying amount of financial assets from the "General governments" counterparty sector is equal to or higher than 1% of the sum of the total carrying amounts for "Debt securities" and "Loans and advances". Therefore, the sample of entities in the table may be smaller than the full sample of entities. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

- C: the value is suppressed for confidentiality reasons.
- 1) Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM).
- 2) European countries not in the EEA.
- 3) RoW: rest of the world, i.e. all countries except European countries.
- 4) Institutions whose non-domestic sovereign exposures are less than 10% of their total sovereign exposures are required to report the exposure at an aggregated level only.
- 5) This table is based on Template C 33.00.a. Institutions are required to report this template twice a year only, in the second and fourth quarters.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available; only the banks that have to comply with the sovereign exposures requirement are accounted in the table.

C: the value is suppressed for confidentiality reasons.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM).

³⁾ European countries not in the EEA.

⁴⁾ RoW: rest of the world, i.e. all countries except European countries.

⁵⁾ Institutions whose non-domestic sovereign exposures are less than 10% of their total sovereign exposures are required to report the exposure at an aggregated level only.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. C: the value is suppressed for confidentiality reasons.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

T03.04.1 Leverage ratio band by reference period

(number of institutions)

| Indicator | Q4 2021 | Q1 2022 | Q2 2022 | Q3 2022 | Q4 2022 |
|-----------------------|---------|---------|---------|---------|---------|
| LR ¹⁾ ≤ 3% | 1 | - | _ | 1 | - |
| 3% < LR ≤ 6% | 47 | 53 | 56 | 61 | 55 |
| LR > 6% | 65 | 59 | 55 | 49 | 56 |
| Total | 113 | 112 | 111 | 111 | 111 |

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

1) LR stands for Leverage Ratio.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

- 1) CCP stands for central counterparty.
- 2) SA stands for standardised approach.
- 3) IM stands for internal model.
- 4) BIA stands for basic indicator approach.
- 5) TSA stands for traditional standardised approach. ASA stands for alternative standardised approach.
- 6) AMA stands for advanced measurement approach.
- 7) Includes "additional risk exposure amount due to fixed overheads", "total risk exposure amount related to large exposures in the trading book" and "other risk exposure amounts".
- 8) Risk weights are calculated as the ratio of the risk-weighted exposure amount to the total exposure amount. Not all exposure classes are presented in the table.

- 1) CCP stands for central counterparty.
- 2) SA stands for standardised approach.
- 3) IM stands for internal model.
- 4) BIA stands for basic indicator approach.
- 5) TSA stands for traditional standardised approach. ASA stands for alternative standardised approach.
- 6) AMA stands for advanced measurement approach.
- 7) Includes "additional risk exposure amount due to fixed overheads", "total risk exposure amount related to large exposures in the trading book" and "other risk exposure amounts".
- 8) Risk weights are calculated as the ratio of the risk-weighted exposure amount to the total exposure amount. Not all exposure classes are presented in the table.
- 9) G-SIBs: global systemically important banks. Data based on the last available list of G-SIBs is used as published by the Financial Stability Board.

Source: ECB.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ CCP stands for central counterparty.

³⁾ SA stands for standardised approach.

⁴⁾ IM stands for internal model.

⁵⁾ BIA stands for basic indicator approach.

⁶⁾ TSA stands for traditional standardised approach. ASA stands for alternative standardised approach.

⁷⁾ AMA stands for advanced measurement approach.

⁸⁾ Includes "additional risk exposure amount due to fixed overheads", "total risk exposure amount related to large exposures in the trading book" and "other risk exposure amounts".

⁹⁾ Risk weights are calculated as the ratio of the risk-weighted exposure amount to the total exposure amount. Not all exposure classes are presented in the table.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available; only the banks using Internal Rating Based approach to calculate their credit risk-weighted exposure amounts are accounted in the table. Where the conditions set out in the applicable regulation are met, the competent authority shall permit institutions to calculate their risk-weighted exposure amounts using the IRB approach. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

C: the value is suppressed for confidentiality reasons.

¹⁾ The countries shown in the table were selected based on the relevance of the aggregate exposure value of the SSM banks using the internal ratings based approach towards the obligors of those countries.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

1) Loans and advances in the asset quality tables are displayed at gross carrying amount. In line with FINREP, held for trading exposures are excluded. As of the reference period Q2 2020, cash balances at central banks and other demand deposits are reported separately from loans and advances.

2) "cb" refers to "cash balances at central banks and other demand deposits".

- 1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.
- 2) Loans and advances in the asset quality tables are displayed at gross carrying amount. In line with FINREP, held for trading exposures are excluded. As of the reference period Q2 2020, cash balances at central banks and other demand deposits are reported separately from loans and advances.
- 3) "cb" refers to "cash balances at central banks and other demand deposits".

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Loans and advances in the asset quality tables are displayed at gross carrying amount. Cash balances at central banks and other demand deposits are excluded.

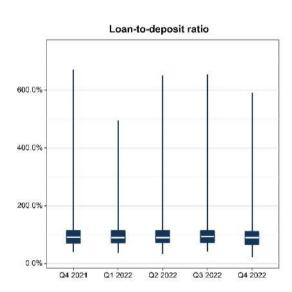

³⁾ Loans and advances at amortised cost (AC) and fair value through other comprehensive income (FVOCI).

- 1) Domestic exposures more than 95% of total debt securities and loans and advances.
- 2) Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM).
- 3) European countries not in the EEA.
- 4) RoW: rest of the world, i.e. all countries except European countries.

T05.02.3 Deposits to total funding ratio by classification (size)

(percentages)

| Category (Q4 2022) | Deposits from credit institutions and other financial corporations to total funding | Deposits from non-financial corporations to total funding | Deposits from households to total funding |
|---------------------------------------|---|---|---|
| Banks with total assets | | | |
| Less than €30 billion | 14.31% | 21.29% | 53.39% |
| Between €30 billion and €100 billion | 19.84% | 11.51% | 39.98% |
| Between €100 billion and €200 billion | 15.51% | 18.65% | 35.18% |
| More than €200 billion | 17.93% | 18.64% | 35.38% |
| G-SIBs 1) | 17.48% | 21.54% | 32.84% |

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) G-SIBs: global systemically important banks. Data based on the last available list of G-SIBs as published by the Financial Stability Board.

T05.02.3 Deposits to total funding ratio by classification (risk-based) 1) (percentages)

| Category (Q4 2022) | Deposits from credit institutions and other financial corporations to total funding | Deposits from non-financial corporations to total funding | Deposits from households to total funding |
|--|---|---|---|
| Banks with low risk | 17.41% | 18.35% | 35.66% |
| Banks with medium, high risk and non-rated | 18.01% | 20.21% | 34.12% |

Source: ECB.

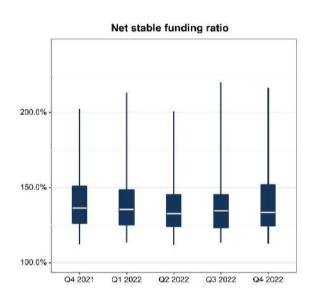

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Data refer to the end of the quarter specified in the header.

³⁾ EHQCB stands for Extremely High Quality Covered Bonds.

T06.02.1 Liquidity coverage ratio band by reference period

(number of institutions)

| Indicator | Q4 2021 | Q1 2022 | Q2 2022 | Q3 2022 | Q4 2022 |
|--------------------------|---------|---------|---------|---------|---------|
| LCR ¹⁾ ≤ 100% | - | 1 | - | - | - |
| 100% < LCR ≤ 150% | 16 | 18 | 22 | 21 | 17 |
| LCR > 150% | 97 | 93 | 89 | 90 | 94 |
| Total | 113 | 112 | 111 | 111 | 111 |

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, as well as mergers and acquisitions.

According to Commission Implementing Regulation (EU) 2021/451 of 17 December 2020 laying down implementing technical standards for the application of Regulation (EU) No 575/2013 of the European Parliament and of the Council with regard to supervisory reporting of institutions and repealing Implementing Regulation (EU) No 680/2014, banks are required to report the liquidity coverage ratio and its components on a monthly basis.

1) LCR stands for Liquidity Coverage Ratio.
